### **ABSTRACT**

Present study has been carried on Ramganga River at Kalagarh, India to assess the seasonal variation of its physico-chemical parameters from April 2013 to March 2014. During the study, the parameters monitored include pH, temperature, transparency; B.O.D., D.O., T.D.S and velocity were studied. Throughout the study period a significant variation in the parameters were observed.

**KEY WORDS:** - Physico-chemical, Correlation, seasonal variation, River Ramganga, Kalagarh, B.O.D.
